Introduction

All California public school students must satisfy the California High School Exit Examination (CAHSEE) requirement, as well as other state and local requirements, in order to receive a high school diploma. Students are required to take the CAHSEE for the first time in grade ten. The CAHSEE requirement can be satisfied by passing the exam or, for students with disabilities, receiving a local waiver pursuant to *Education Code* Section 60851(c), or receiving an exemption pursuant to *Education Code* Section 60852.4.

On August 23, 2007, the California Department of Education (CDE) will release summary results from the CAHSEE administrations during the 2006–07 school year. Results will be provided at the school, school district, county, and state levels and will be posted on the CDE Web site at <http://cahsee.cde.ca.gov>. Individual student CAHSEE results are confidential and are not included in the Internet posting.

It is important that school, school district, and county administrators respond proactively to inquiries about local CAHSEE results for the 2006–07 school year. Local efforts to communicate with key stakeholders can develop a foundation of understanding about this exam and what is being done to prepare students to meet this requirement. This assistance packet provides county offices of education, school districts, and schools with the information they need to access summary results online and interpret those results.

Greater Access to Content Standards

Since 2001, students have had increased access to the state content standards through CDE's publication of standards-based resources for school districts, teachers, students, parents and guardians, and through the adoption of kindergarten through grade eight instructional resources in mathematics and English-language arts.

The Human Resources Research Organization (HumRRO), the independent evaluator of CAHSEE, reported in its biennial evaluation that schools were offering more classes in standards-based instruction and concluded that:

The CAHSEE requirement has been a major factor leading to dramatically increased coverage of the California content standards at both the high school and middle school levels and to development or improvement of courses providing help for students who have difficulty achieving these

standards. (*Independent Evaluation of the California High School Exit Examination [CAHSEE]: Second Biennial Report*, February 1, 2004, Executive Summary, p. iii, General Finding 2)

CAHSEE Resources for School Districts, Teachers, Students, Parents, and Guardians

The following CAHSEE and standards-based resources are available on the CDE Web site at <http://www.cde.ca.gov/ta/tg/hs/> under “Program Resources”:

- *Preparing for the CAHSEE: A Mathematics Study Guide* and *Preparing for the CAHSEE: An English-Language Arts Study Guide* for students and their parents (2004; reprinted 2005 and 2006)
- *California High School Exit Examination – Mathematics Teacher Guide* and *California High School Exit Examination – English-Language Arts Teacher Guide* (2004)
- The release of 184 mathematics CAHSEE test questions, 183 English-language arts multiple-choice test questions, and 9 writing tasks (2001–06)

The State Board of Education adopted instructional materials aligned to state content standards for mathematics and English-language arts are available on the CDE Web site at <http://www.cde.ca.gov/be/st/> under “Standards & Frameworks”:

- *Reading/Language Arts Framework for California Public Schools* (2007)
- *Mathematics Framework for California Public Schools* (2005)
- *English-Language Arts Adoption of Instructional Materials* (January 2002, Supplemental Follow-up 2005)
- *Mathematics Adoption of Instructional Materials* (January 2001, Supplemental Follow-up 2005)

2006–07 CAHSEE Key Reporting Dates

August 13, 2007	<i>Explaining 2006–07 Summary Results: Information for Counties, School Districts, and Schools</i> posted on the CDE Web site
August 20, 2007	CAHSEE 2006–07 summary results available to school districts for review on the Internet
August 22, 2007	CAHSEE results accessible to the media through the Internet (with embargo)
August 23, 2007	State Superintendent of Public Instruction holds a press conference and teleconference News release on 2006–07 CAHSEE summary results distributed to the media, school districts, and county offices of education CAHSEE 2006–07 summary of results for schools, school districts, counties, and the state are posted on the Internet
October 2007	<i>CAHSEE Reporting Individual Students Results for the 2007–08 School Year: Assistance Packet for School Districts and Schools</i> posted on the Internet

Facts about the California High School Exit Examination (CAHSEE)

State law, enacted in 1999, authorized the development of the California High School Exit Examination (CAHSEE), which students in California public schools would have to pass to earn a high school diploma. All California public school students must satisfy the CAHSEE requirement, as well as all other state and local requirements, to receive a high school diploma. The CAHSEE requirement can be satisfied by passing the exam or, for students with disabilities, receiving a local waiver pursuant to *Education Code* Section 60851(c), or receiving an exemption pursuant to *Education Code* Section 60852.4.

The Purpose of the CAHSEE

The purpose of the CAHSEE is to improve student achievement in high school and to help ensure that students who graduate from high school can demonstrate grade-level competency in reading, writing, and mathematics.

Test Content

The CAHSEE consists of two parts: English-language arts (ELA) and mathematics. Test questions address California content standards that a High School Exit Examination Standards Panel, appointed by the State Superintendent of Public Instruction, determined students should know to graduate from high school.

English-Language Arts

The ELA part of the exam, which addresses state ELA content standards through grade ten, has a reading section and a writing section. The reading section covers vocabulary, informational reading, and literary reading. This section

includes 50 percent literary texts and 50 percent informational texts. The writing section covers writing strategies, applications, and conventions. The ELA part of the exam consists of multiple-choice questions as well as a writing task, in which students are asked to write on a specific topic or in response to a literary or informational passage.

Mathematics

The mathematics part of the CAHSEE addresses state mathematics content standards through the first part of Algebra I. It includes statistics, data analysis and probability, number sense, measurement and geometry, algebra and functions, mathematical reasoning, and Algebra I. Students must demonstrate computational skills and a foundation in arithmetic, including working with decimals, fractions, and percentages. The math part of the exam is composed entirely of multiple-choice questions.

The CAHSEE blueprints provide more information on the content of the exam and are available on the California Department of Education (CDE) Web site at <http://www.cde.ca.gov/ta/tg/hs/resources.asp>.

CAHSEE Exemptions and Waivers

For certain students with disabilities, an exemption or waiver of the CAHSEE requirement may be available.

Exemptions

Education Code Section 60852.4 provides an exemption of the requirement to pass the CAHSEE for students with disabilities scheduled

to receive a diploma on or before December 31, 2007 if the following conditions are met:

1. The student has an operative individualized education program (IEP) adopted pursuant to the federal Individuals with Disabilities Education Act or a plan adopted pursuant to Section 504 of the federal Rehabilitation Act of 1973.
2. The IEP or Section 504 Plan of the student, which is dated on or before July 1, 2006, indicates that the student has an anticipated graduation date, and is scheduled to receive a high school diploma on or before December 31, 2007.
3. The school district or state special school certifies that the student has satisfied or will satisfy all other state and local requirements for the receipt of a high school diploma on or before December 31, 2007.
4. The student has attempted to pass the CAHSEE sections not yet passed at least twice after grade 10, including at least once during the current grade 12 year of the student, with the accommodations or modifications, if any, specified in the IEP or the Section 504 Plan of the student.
5. Either (i) the student received remedial or supplemental instruction focused on the CAHSEE sections not yet passed from his or her school, private tutoring, or another source, or (ii) the school district or state special school failed to provide the student with the opportunity to receive that remedial or supplemental instruction.
6. If the student received remedial or supplemental instruction as described in item 5, the student has taken the CAHSEE sections not yet passed at least once following the receipt of that remedial or supplemental instruction.
7. No later than 30 days prior to the receipt of a diploma in 2007, the student, or the parent or legal guardian of the student if

the student is a minor, has been notified in writing that the student is entitled to receive free appropriate public education up to and including the academic year during which the student reaches the maximum age pursuant to *Education Code* Section 56026(c), or until the student receives a high school diploma, whichever event occurs first.

Waivers

Education Code Section 60851(c) permits local school boards to grant a waiver of the CAHSEE requirement to students with disabilities who take the CAHSEE using modifications and receive the equivalent of a passing score.

At the request of the student's parent or guardian, a school principal must submit to the local school governing board a request for a waiver of the requirement to pass the part(s) of the CAHSEE on which a modification was used and the equivalent of a passing score was earned. For the local board to waive the CAHSEE requirement, the principal must certify that the student has met the following conditions:

1. An IEP or Section 504 Plan is in place that requires the accommodations or modifications to be provided to the student when taking the CAHSEE.
2. The student has either satisfactorily completed or is in progress towards completing high school level curriculum sufficient to have attained the skills and knowledge otherwise needed to pass the CAHSEE.
3. The student has an individual score report showing that the student has received the equivalent of a passing score on the CAHSEE while using a modification.

Students with Disabilities

CAHSEE regulations specify accommodations and modifications that students with disabilities must be permitted to use if specified in the student's IEP or Section 504 Plan for use on the CAHSEE, standardized testing, or for use during classroom instruction and assessments. An accommodation is a change in the testing environment or process that does not alter what the CAHSEE measures or affect the comparability of scores, whereas a modification is a change that fundamentally alters what the CAHSEE measures or affects the comparability of scores.

Students who use an accommodation and earn a score of 350 or higher have passed that part of the CAHSEE. Students who use a modification and earn the equivalent of a passing score on one or both parts of the CAHSEE have not passed but may be eligible for a waiver of the CAHSEE requirement (as described previously).

English Learners

English learners must be permitted to take the CAHSEE with certain test variations if used regularly in the classroom. For example, if regularly used in the classroom, English learners must be permitted to hear the test directions in their primary language or use a translation glossary.

Students who are English learners are required to take the CAHSEE in grade ten with all other grade ten students. During their first 24 months in a California school, English learners are to receive six months of instruction in reading, writing, and comprehension in English (*Education Code* Section 60852). During this time, they are still required to take the CAHSEE.

Testing Opportunities

All students are required to take the CAHSEE for the first time in grade ten. Students who do not pass one or both parts of the CAHSEE in grade ten have up to two opportunities in grade eleven and up to three opportunities in grade twelve to retake the part(s) of the exam not yet passed. The CAHSEE testing schedule through the 2007–08 school year is posted on the Internet at <http://www.cde.ca.gov/ta/tg/hs/admin.asp>. School districts select their testing dates from this schedule.

Results and Reports

To pass the CAHSEE, a scale score of 350 or higher is required on each part. Students do not need to pass both parts of the CAHSEE during the same administration to satisfy the CAHSEE requirement. Students who do not pass one or both parts of the CAHSEE in grade ten will have additional opportunities to take the CAHSEE in grade eleven and again in grade twelve, if needed.

About eight weeks after each administration of the exam, school districts receive two copies of the CAHSEE Student and Parent Report for each student who took the examination. When school districts receive these reports, they are to immediately distribute one copy to parents and guardians and place the other copy in the student's permanent record.

It is important that parents and guardians keep a copy of the student report for their own records. The CDE does not keep a copy of individual student reports. Individual student scores must be maintained by the student's school district and the school district must ensure the records are maintained confidentially. (See *Education Code* Section 49073 and *Title 20 United States Code* Section 1232[g].)

Supplemental Instruction

School districts must provide supplemental instruction aligned with the state content standards to assist students in grades seven through twelve who do not demonstrate sufficient progress toward passing the CAHSEE (*Education Code* sections 37252 and 60851[f]). By statute, students who do not possess sufficient English language skills shall be considered students who do not demonstrate sufficient progress toward passing the CAHSEE and must receive supplemental instruction designed to assist such students to succeed on the CAHSEE (*Education Code* Section 37252[d]).

State and Federal Accountability Requirements

The state and federal governments use the CAHSEE as a measure of school and school district accountability. The state accountability program is the Public Schools Accountability Act, and the federal accountability program is the No Child Left Behind (NCLB) Act. The use of CAHSEE results for these accountability programs in no way affects how the CAHSEE is used for individual student accountability.

More Information

Additional CAHSEE information is available on the CDE Web site at <http://www.cde.ca.gov/ta/tg/hs/>. Parents and guardians should direct their questions to their student's teachers or contact the school principal or counselor.

Overview of Internet Reports

The 2006–07 CAHSEE summary results will be accessible through the CDE Web site at <http://cahsee.cde.ca.gov>. This Web site has a link to the CDE DataQuest Web site, where the reports are generated. Instructions to assist you in accessing this Web site are included in this section.

The DataQuest Web site will display:

- Summary results for the July, October, November, and December 2006 and the February, March, and May 2007 administrations.
- Summary results at the school, school district, county, and state levels.
- Combined results of the July, October, November, and December 2006 and the February, March, and May 2007 administrations.
- Summary results for students by grade, gender, ethnicity, language fluency, socioeconomic status, and special education program participation.
- Summary results for English-language arts, including number of students tested, number passed, percent passed, number not passed, percent not passed, average (mean) scale score, average percent correct for reading (word analysis, reading comprehension, literary response and analysis) and writing (writing strategies, writing conventions), and the average of two independent scores for the writing application (i.e., essay).
- Summary results for mathematics, including number of students tested, number passed, percent passed, number not passed, percent not passed, mean scale score, and average percent correct for mathematics strands (probability and statistics, number sense, algebra and functions, measurement and geometry, and Algebra I).
- Summary roster reports at the school district, county, and state levels. For example, a school district roster report for any given administration would display the overall results for each school in the school district that participated in that administration.

2006–07 CAHSEE Summary Results: Tab-Delimited Research Files

When the 2006–07 CAHSEE summary results are released, research files also will be available in tab-delimited format to allow for more complex analyses and customized reporting of the data. These research files and a research file layout will be available on the CDE Web site at <http://cahsee.cde.ca.gov>.

Accessing Internet Reports

This section provides directions to access district-level results on the CDE Web site. Reports for schools, counties, and the state can be accessed using a similar approach.

The screenshot shows the California Department of Education website. At the top, there is a navigation bar with links: Curriculum & Instruction, Testing & Accountability, Professional Development, Finance & Grants, Data & Statistics, Learning Support, and Specialized Programs. Below this, the page is titled "CAHSEE Results » Reports". The main heading is "California High School Exit Exam (CAHSEE) Internet Reports". Under this heading, there are four links: School Reports, District Reports, County Reports, and State Reports. At the bottom, there is contact information for the CAHSEE Office and a "Last Modified" date of August 23, 2007.

To access the CAHSEE district-level results:

1. Go to <http://cahsee.cde.ca.gov/reports.asp>
2. Click on "District Reports."

The screenshot shows the DataQuest page on the California Department of Education website. At the top, there is a navigation bar with links: Curriculum & Instruction, Testing & Accountability, Professional Development, Finance & Grants, Data & Statistics, Learning Support, and Specialized Programs. Below this, the page is titled "California High School Exit Exam (CAHSEE)". The main heading is "Select Year of Data and Enter District Name". Under this heading, there are two instructions: 1) Determine time frame: and 2) Type a portion of the name then press the "Submit" button. There is a dropdown menu for "Single year -- select year:" with "2006-07" selected. Below this, there is a text input field and a "Submit" button.

3. From the drop down menu, select a school year.
4. Type a portion of the district name.
5. Click the "Submit" button.

California High School Exit Exam (CAHSEE) [CAHSEE Research Files](#)

Year of data selected: 2006-07

Select District:
3467439 --- Sacramento City Unified

Select Report:

- ☐ High School Exit Exam Results by Program
- ☐ High School Exit Exam Results by Program (with school info.)
- ☐ High School Exit Exam Results by Gender, Ethnicity
- ☐ High School Exit Exam Results by Gender, Ethnicity (with school data)
- ☐ District Roster (with school data)
- ☒ CAHSEE District Report

Specify administration: Combined

Select Test: (District Roster or CAHSEE District Report)

- ☒ English-Language Arts (ELA)
- ☐ Mathematics

Specify grade level: 10

IMPORTANT NOTE REGARDING COMBINED REPORTS
 Combined reports aggregate results from all Grade 10 exam administrations during the selected school year (February, March, and May).

6. From the drop-down menu under “Select District,” select a school district.
7. Under “Select Report,” select “CAHSEE District Report”.
8. From the drop-down menu beside “Specify administration,” select one of the administrations. The “Combined” option will combine results from all Grade 10 exam administrations during the selected school year (February, March, and May).
9. Under “Select Test,” select the English-Language Arts (ELA) or Mathematics option.
10. Use the drop-down menu next to “specify grade level” to choose a grade.
11. Click the “Submit” button.

CAHSEE Summary Reports

The CAHSEE summary reports are available through the CDE Web site at <http://cahsee.cde.ca.gov> and provide school, school district, county, and state results for either a single test administration or for combined administrations within a school year. Various report options are available through DataQuest, but two primary reports are the Demographic Summary Reports and Roster Reports. The Demographic Summary Reports display results for various demographic categories including grade, gender, race/ethnicity, language fluency, economic status, migrant education program participation, special education program participation, and students tested with modifications. The Roster Reports display overall results for (1) all schools within a school district, (2) all school districts within a county, and (3) all counties within the state.

This section contains samples of the following school district reports:

- English-Language Arts Demographic Summary for All Students Tested
- Mathematics Demographic Summary for Grade Ten Students
- Mathematics Demographic Summary for All Students Tested
- Mathematics Roster for All Students Tested

Similar reports are available at the school, county, and state levels.

Demographic Summary Report Column Heading Definitions

The following are the definitions for each column heading used on Demographic Summary Reports and Roster Reports.

Number Tested – This represents the number of valid answer documents scored overall and by demographic category. Number tested does not include invalid answer documents that represent students who were tested and did not answer enough test questions to be scored, took the test with a modification, or cheated. The sum of the number tested by demographic category is equal to the number for “All Students Tested.”

Number Passed – This represents the number of students who received a passing score (i.e., a scale score of 350 or greater). The number passed by demographic category is a subset of the Number Tested.

Percent Passed – This represents the percentage of students who received a passing score (i.e., a scale score of 350 or greater). The percent passed is calculated by dividing the number of students who passed by the number of students for whom there were valid answer documents and multiplying by 100.

Number Not Passed – This represents the number of students who did not receive a passing score (i.e., a scale score of less than 350). The number not passed by demographic category is a subset of the Number Tested. The number passed plus the number not passed equals the number tested.

Percent Not Passed – This represents the percentage of students who did not pass. The percent not passed is calculated by dividing the number of students who did not pass by the number of students for whom there were valid answer documents and multiplying by 100.

Mean Scale Score – This is the average scale score of all students who took the English-language arts or mathematics examination on the test date. The mean scale score is calculated by summing the actual scale scores for each student tested and dividing the sum by the number of students for whom there were valid answer documents.

English-Language Arts*

The English-language arts reports provide the following results:

Reading – The reading section includes the percent correct in each reading strand (Word Analysis, Reading Comprehension, Literary Response and Analysis) tested in English-language arts.

Writing – The writing section includes the percent correct in each writing strand (Writing Strategies, Writing Conventions) tested in English-language arts.

Writing Application – The writing application includes the total number of points awarded to the student essay. The student essay receives two scores that range from 1.0 (lowest) to 4.0 (highest) or non-scorable (NS). The average of these two scores is listed. The writing application score counts for 20 percent of the total English-language arts score. Please note that there is not a separate passing score for the essay.

* This report is not provided when accessing data in the combined administration mode.

Mathematics*

The mathematics reports provide the following results:

Strands for Mathematics – The average percent correct for each mathematics strand (Probability & Statistics, Number Sense, Algebra & Functions, Measurement & Geometry, and Algebra I) is listed in the last five columns, overall and by demographic category.

Note: Dashes (--) indicate that for groups of ten or fewer students, data were suppressed to maintain the anonymity of the students tested.

* This report is not provided when accessing data in the combined administration mode.

Using 2006–07 Results to Promote Student Success

A Chronology of the CAHSEE: 1999-2007

Glossary of Terms

Web Site Resources

Using 2006–07 Results to Promote Student Success

Counties, school districts, and schools are encouraged to use the 2006–07 summary results and other standards-based evidence of student achievement to develop and implement an ongoing process for refining classroom instruction and school programs. The goal is to work with school staff to identify patterns of student performance and identify program areas needing improvement. The steps outlined below can be used by school personnel to analyze student performance, evaluate classroom instruction, and develop a plan for improvement.

Purpose

- To develop and implement an ongoing process for refining classroom instruction and school programs, using CAHSEE results and other standards-based evidence of student achievement
- To involve all staff, with student and parent input, in the evaluation and refinement process and articulate identified refinements with other district schools
- To develop a plan to provide additional assistance for students who did not pass one or both part(s) of the CAHSEE

Examples of data that could be used for evaluating student achievement might include but not be limited to:

- Student feedback concerning student preparation and CAHSEE results
- Individual, school, and school district CAHSEE data from previous administrations
- STAR data and grade records for students participating in the CAHSEE
- Comparative data from feeder school program participation and current and past CAHSEE results
- Program participation data from any remedial programs offered by the school or by outside agencies
- Any other relevant data collected by the school (attendance rates, disciplinary referrals, etc.)
- Assessments aligned with state content standards
- School district and school level formative or benchmark assessments
- Passing rates and program information from schools similar in student population or geography

Step 1. Identify and collect data about the academic achievement of students (individual and group data).

- Construct a process for identifying, collecting, and compiling the data to examine patterns across individual student and group scores. (A staff work group, consisting of those involved with intervention as well as a representative(s) from administration and content areas of English-language arts and mathematics should be convened for this phase of the process.)
- Identify sources of information that are available to use in the review of the academic achievement of students.
- Gather data from all students who have completed the CAHSEE, whether or not they passed, to obtain feedback from

students about the support they have been given and to identify effective and ineffective strategies offered through classroom instruction and other support activities.

- Collect and compile data from other sources about student achievement to help identify students needing some level of intervention and program areas (curriculum and/or instruction) needing modification.

Step 2. Review collected data about the academic achievement of students to prepare information for possible program planning.

- Once the student information has been completed and gathered, compile results for staff review.
- Develop a plan for how to combine student achievement data from multiple sources.
- Compile data about student achievement from other sources to identify possible program modifications, students in need of intervention, and to design intervention efforts.

Ten Essential Questions for Reviewing Student Data

1. What percentage of first-time test takers passed the CAHSEE? Is this number an increase or decrease over past test administrations? What does this increase or decrease signify?
2. What percentage of eligible students have taken the CAHSEE more than once? How do the passing rates compare with past test administrations?
3. What does CAHSEE, or other test data, reveal about the achievement of subgroups?
4. Of those students who have taken the CAHSEE more than once, are their scores changing? If yes, by how many points? Do those students who are changing their scores fall into any type of pattern (e.g., gender, participation in certain programs)?
5. Do patterns identify any strengths or weaknesses in instructional programs for mathematics and English-language arts? How do the identified strengths and weaknesses relate to the content standards addressed in those core subjects?
6. Are the results of the CAHSEE predictable according to data from feeder schools? Is there a relationship between middle and high school grades and scores on the CAHSEE? How do CAHSEE results compare with STAR results, and what patterns may be seen in the differences that exist?
7. How do other school data help predict passing rates? Is there a relationship, for example, between attendance and passage? Do test results tend to correspond with data about program changes or transfer and/or dropout rates? What steps are being taken to address any existing correlations?
8. What programs are identified by staff and students and supported by data as the most effective for remediation?
9. Within each program that provides supplemental instruction, what materials and/or strategies do students identify as most helpful (effective)? Do test results support this perception?
10. What additional programs serving similar student populations might be used for remediation? What is the success rate of these programs?

- Organize staff work groups by content area to review, analyze, and evaluate data about student achievement.
- With results of the data review, prepare a brief but comprehensive report by the work group for presentation to the entire staff. (The report should include suggestions regarding program improvement, based on the data presented.)
- Evaluate student feedback concerning CAHSEE results and student preparation.

Step 3. Evaluate classroom instruction and/or programs implemented to ensure student success (based on data review).

- Convene a staff meeting (all staff) for a presentation of the findings and recommendations of the data review work group. (Successes should be highlighted and celebrated first; then the conversation should focus on developing a list of priorities for refining the curriculum, instruction, assessment, and remediation.)
- Ask all staff members to examine their own roles in student preparation and support, and to identify at least one change they plan to make to improve the academic achievement for their students.
- Convene staff members by department to discuss results of the individual CAHSEE preparation analysis and to consider program and instructional recommendations.
- Record intended goals by department and each individual and determine a method for collecting data to evaluate results after program changes have been implemented.
- Submit to the administration a summary of proposed program refinements prepared by each department.
- Identify diagnostic tools teachers can use to evaluate their students' specific strengths and weaknesses.
- Determine methods for evaluating how students are placed in intervention programs and what programs are successful.

Step 4. Incorporate proposed program changes, identified through the evaluation process, into the school plan and continue implementation and refinement.

- Review proposed program changes/refinements with each department and finalize recommendations.
- Compile all finalized departmental reports and incorporate into a school action plan, with timeline, identifying roles and responsibilities, needed professional development activities, and methods for monitoring progress and evaluating outcomes.
- Plan and conduct training(s) for instituting changes and schedule staff time for evaluating progress and/or making additional modifications.
- Develop a school accountability system to ensure that changes are carried out.

Step 5. Communicate program results and steps for refinement to key stakeholders.

- Identify populations that must be informed and/or included in program refinement planning or implementation; these might include but not be limited to:
 - **District staff, including administrators and their support staff** – All staff should be updated about programmatic changes as they are made.
 - **Governing boards** – Board members need clear explanations of program changes to allow for informed decision-making if new policies, policy modifications, and/or funding are necessary.
 - **Student population** – Students should be informed about changes, and changes made in response to student requests should be acknowledged.
 - **Parents, guardians, and families** – Parents, guardians, and families should be kept informed of all changes, even if their students are not directly involved.
 - **General public** – The general public should be kept informed about the CAHSEE and what is being done to prepare students for the test.
 - **Feeder districts and alternative school sites** – Ongoing dialogue should be conducted between feeder schools and receiving high schools, as well as any alternative sites for students. (Feeder schools should receive information about their former students' achievement on standards addressed on the CAHSEE.)
- Make a particular effort to provide accurate and timely information to parents, guardians, and students who are at risk of not passing the CAHSEE. Program changes that will impact students should be explained and, when possible, acknowledged in writing by both the student and the student's parents or guardians.
- Make information available in the parents' and guardians' primary languages, when possible. (Every effort also should be made to deliver important information outside of traditional channels [e.g., through television and radio programs in parents' and guardians' primary languages].)
- Include information to students and their parents or guardians about all options for delivery of student services, including scheduling of available services, services provided, and methods for evaluating program effectiveness. Copies of all information should be preserved for documentation and reference.
- Communicate with the general public through news releases and other news sources. (Information should include positive test results, program improvements, and curricular and/or instructional programs that still need improvement. Schools should make every effort to demonstrate the goal that all students can and will be successful. Efforts to keep the public informed also should include information about the difficulty level of the CAHSEE [including sample test items], what is being done to prepare students for the test, and directions to access group test results posted on the Internet.)

Glossary of Terms

Academic Performance Index (API)

The API is a state requirement under the Public Schools Accountability (PSAA) Act of 1999. The API is a single number that ranges from 200 to 1000 and indicates how well a school performed academically the previous year. A complete explanation of all API criteria is available on the CDE Web site.

Accommodations

Accommodations are variations in the administration of an assessment. Accommodations include variations in scheduling, setting, timing, response mode, presentation format, and others. The term accommodation commonly refers to changes that do not alter in any significant way what the test measures or the comparability of scores. Accommodations are identified in the student's individualized education program (IEP) or Section 504 Plan and should be used regularly during instruction and classroom assessments. A complete list of allowable accommodations is included in the *Matrix of Test Variations, Accommodations, and Modifications for Administration of California Statewide Assessments* that is available on the CDE Web site.

Adequate Yearly Progress (AYP)

AYP is a requirement under the federal No Child Left Behind (NCLB) Act of 2001. Under NCLB criteria, schools and local educational agencies (e.g., school districts, county offices of education, and charter schools) must annually meet or exceed specified criteria to make AYP. A complete explanation of all AYP criteria is available on the CDE Web site.

Blueprints

The blueprints outline the specific content standards tested and the number of questions included for each grade level and subject area.

California High School Exit Examination (CAHSEE)

The CAHSEE is a graduation requirement that was first authorized by state law in 1999. Beginning with the graduating Class of 2006, California public school students must pass both parts of the CAHSEE, including English-language arts (ELA) and mathematics, to receive a high school diploma. The purpose of the CAHSEE is to significantly improve student achievement in

public high schools and to ensure that students who graduate from public high schools can demonstrate grade-level competency in reading, writing, and mathematics. This test is aligned to selected state-adopted content standards in ELA and mathematics.

Content Standards

Adopted by the State Board of Education (SBE), state content standards are statements that describe what all students in California public schools should know and be able to do in particular subject areas or courses and grade levels. These standards define for administrators, teachers, parents, guardians, students, and the community what is expected for all students.

Mean Scale Score

A mean scale score is the arithmetic mean or average of the scale scores for all students who took the CAHSEE. A mean scale score for the CAHSEE is the average score of all students who took the English-language arts or mathematics part of the examination on the test date.

Modifications

A modification is a change to the testing conditions, procedures, and/or formatting so that the measurement of the intended construct is no longer valid. A complete list of modifications on the state assessments is included in the *Matrix of Test Variations, Accommodations, and Modifications for Administration of California Statewide Assessments* that is available on the CDE Web site at <http://www.cde.ca.gov/ta/tg/hs/accommod.asp>.

No Child Left Behind (NCLB)

The No Child Left Behind Act provides federal funds for school districts with disadvantaged children in order to close achievement gaps. It also requires states to set standards for education and to test students each year to determine whether the standards are being met by all students. In addition, NCLB provides funding to help teachers become highly qualified. It also provides additional funding and prescribes consequences to schools that fail to achieve academic targets set by their state.

Performance Levels

Performance levels are ranges of scores in which students have demonstrated sufficient knowledge and skills to be regarded as performing at a particular achievement level. To meet NCLB requirements, California reports three performance levels on the CAHSEE: advanced, proficient, and basic.

Scoring Rubrics

Scoring rubrics are the guidelines used to score the student response to the writing task on the English-language arts part of the CAHSEE. The criteria in the rubrics address state writing strategies, writing applications, and written conventions standards that are part of the California English-language arts content standards. Readers use the rubrics to assign a score from 4 (high) to 1 (low) to each student's written response.

Standards-Based Assessments

Standards-based assessments are developed to be aligned with specific content standards. Results on standards-based assessments are reported based on clearly defined performance categories or levels. Since the interpretation of performance is relative to a criterion or cut score (i.e., a scale score of 350 defines the lower range of basic and meets the CAHSEE requirement*), such standards-based assessments support criterion-referenced interpretations. The CAHSEE is a standards-based assessment.

Subgroup

A subgroup is a subset of students. For example, the federal NCLB Act of 2001 identifies specific subgroups of students who must achieve adequate yearly progress. These identified subgroups are race or ethnicity, students with disabilities, limited English proficient, and socioeconomically disadvantaged.

* If a student used a modification on the CAHSEE and received a 350 or higher they have not met the requirement and must submit a request to their local school governing board to waive the CAHSEE requirement.
